Patent No. US20010016575A1

GENERAL INFORMATION:

APPLICANT: Loren J. Miraglia, Pamela Nero, Mark J.

APPLICANT: Graham, Brett P. Monia

TITLE OF INVENTION: ANTISENSE MODULATION OF HUMAN MDM2

TITLE OF INVENTION: APPRESSION

NUMBER OF SEQUENCES: 271

CORRESPONDENCE ADDRESS:

ADDRESSEE: Law Offices of Jane Massey Licata

STREET: 66 East Main Street

CITY: Marlton
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         0.8%; Score 20; DB 1; Length 20; 100.0%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 223, Application US/09752983

Patent No. US2001001657541

GENERAL INFORMATION:

APPLICANT: Graham, Brett P. Monia

TITLE OF INVENTION: EXPRESSION

ITILE OF INVENTION: EXPRESSION

NUMBER OF SEQUENCES: 21

CORRESPONDENCE ADDRESS:

ADDRESSEE: Law Offices of Jane Massey Licata

STREET: 66 East Main Street

CITY: Mariton

STATE: NJ

COUNTRY: U.S.A.

ZIP: 08053

COMPUTER REAABLE FORM:

MEDIUM TYPE: DISKETTE, 3.5 INCH, 1.44 Mb STORAGE

COMPUTER: MANDOWS 95

SOFTWARE: WORDERREET 6.0

COMPUTER: WORDERREET 6.0

STATE: WORDERFEET 6.0

COMPUTER: 10053

COMPUTER: 10053

COMPUTER: 10053

COMPUTER: 02-Jan-2001

CLASSIFICATION NUMBER: US/09/752,983
